

Your data center contains numerous switches from various manufacturers, each with system-specific requirements and coding. Feeling frazzled? We have the solution!

Axiom's full line of Direct Attach Copper and Active Optical Cables!

Axiom provides 100% OEM compatible cables outfitted with OEM-specific end point coding to meet the requirements set forth by the router and switch OEMs, making installation quick and simple. Offered in 100Gb, 40Gb, 25Gb, and 10Gb, Axiom's reliable and flexible cables boost ultra-low latency in an array of lengths, perfect for your network, server and storage environments.

Benefits of DAC:

- Ease of installation for connections between various OEM applications
- Most cost-effective option for short reach interconnects
- Low power consumption with minimal cooling requirements for reduced data center operating expenses
- Interchangeable with fiber optic modules for flexible hardware connections

Benefits of AOC:

- Longer reach, reducing the need for upgrades
- Lightweight material and lower weight than direct attach copper
- Smaller footprint allowing more air flow in constrained environments
- Flexible cable with increased bend radius
- No interference with electromagnetic energy
