

End-to-end networking solutions for AI data centers

AI Data Center Network Bottlenecks Solved

AI workloads require more robust data center networking fabrics. Optimized solutions are needed to address data transfer and latency bottlenecks in powerful GPU clusters.

Axiom offers:

- **Infiniband/Ethernet options:** Axiom solutions support both the high-performance computing capabilities of Infiniband and the simplicity of Ethernet for AI workloads
- **High-speed transceivers (200G/400G/800G):** Efficiently move data in AI environments with high-bandwidth OSFP and QSFP-DD optical transceivers
- **Breakout DAC lineup:** Transceiver & high-speed cable lineup with optical connections supporting InfiniBand.

Axiom empowers you to unlock the full potential of AI. Contact us today!
