

CABLE OVERVIEW

Axiom offers a complete line of copper, fiber, direct attach copper (DAC), active optic cable (AOC) and custom cabling products for all your connectivity and networking needs.

GUARANTEED
100% OEM
COMPATIBLE

TRUSTED ALTERNATIVE

Guaranteed to be 100% OEM compatible, all Axiom networking products meet or exceed OEM specifications for quality, functionality and performance. Backed by our proven track record of manufacturing excellence and unbeatable support, each Axiom networking product offers peace of mind and exponential cost savings with our lifetime replacement warranty.

Leading the way in cable technology, Axiom has revolutionized cable performance with the launch of BENDnFLEX®. These cables offer increased performance while delivering durability and simplicity through its bend-insensitive capabilities. Available in copper and fiber, performance and tight spaces will no longer serve as obstacles in your installations. All BENDnFLEX® cables are TAA compliant and backed by Axiom's Lifetime Warranty.

COPPER + FIBER

The BENDnFLEX® Cat6 and Cat6a have a reduced diameter, which will increase airflow and is perfect for high density applications. The high performance BENDnFLEX® fiber cables have an extremely high bend radius, which is perfect for tight installations.

THE OEM Alternative®

COPPER CABLES

Axiom's durable and reliable patch cables are essential for high performance networking applications, network adapters, switches, hubs, routers, DSL/cable modems and patch panels. Offering multi-colored cables and a snagless design, Axiom copper cables deliver simple integration with hassle-free installation.

MULTIPLE
COLORS +
SNAGLESS

FIBER OPTIC

Offering fiber cables with a wide array of connector types and fiber jacket options, Axiom's optical cables empower integration with the most popular fiber optic applications and networks. Need help determining the proper cable?

Be sure to visit our fiber configurator:

DAC - SFP28, SFP+, QSFP+, and 100Gb QSFP28

DAC - DIRECT ATTACH COPPER

Axiom's complete line of Direct Attach Copper (DAC) offers comprehensive reliability and speed for your network environment with ultra-low latency and an array of lengths to choose from. For top of rack and inter-rack applications, Axiom delivers optimum performance and speed. Covered by a lifetime warranty, Axiom is the key to discovering the right solution that is perfect for all switches or servers.

AOC - ACTIVE OPTIC CABLES

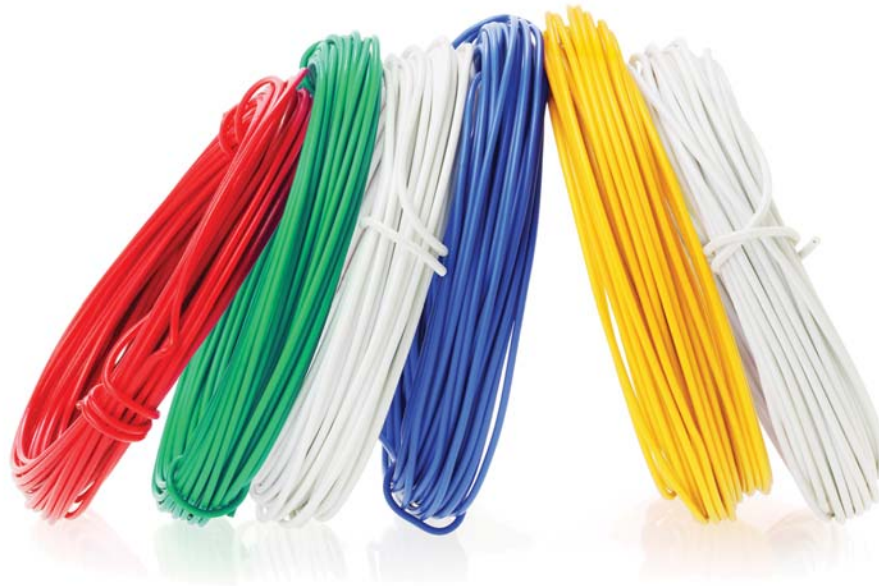

Axiom's Active Optic Cables (AOC) achieve high data rates over long reaches. Using a fraction of the power and significantly lowering your costs, Axiom's AOC streamlines installation for high-performance computing and storage applications.

AOC - SFP+, QSFP+, and 100Gb QSFP28

CUSTOM CABLES

Axiom Custom Cables offers exact cable lengths for every situation. All cables are TAA compliant, made in the USA, and typically available to ship within 24-48 hours. Also available in an extensive variety of colors, organizing and color-coding has never been easier with Axiom Custom Cables.

GSA/TAA COMPLIANT

TAA compliant cables are available through Axiom. Offering cables made in the USA, Axiom cables comply with TAA regulations and adhere to the highest standards, from design to testing. Backed by a lifetime warranty and expert technical support, all TAA cable products deliver trust and quality for any upgrade.

THE OEM Alternative®

A/V CABLES

Audio and video cables are essential in our everyday lives. A/V cables are needed for a variety of devices such as HDTVs, entertainment centers, mobile workplaces, and surround sound systems. Whether it's in the office, school, or at home Axiom delivers A/V cables to connect it all.

Surface Pro Adapters

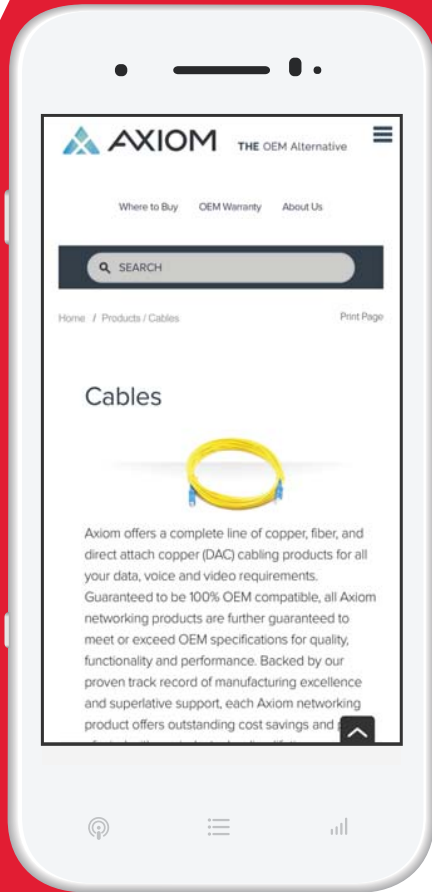

Charge your Surface® and Surface Pro at home, in the office, or on the go. Adapters are available for both devices including an option for the car. Charging your device is now easy and more importantly, portable.

BEYOND CABLES - NETWORKING SOLUTIONS

Axiom enables organizations to optimize their IT infrastructure by offering a complete networking portfolio.

- Fiber Optic Transceivers
- Hot-swap Enterprise HDD & SSDs
- Server Memory
- 40Gb & 10Gb Fiber Optic and Copper Server Adapters (NICs)
