

CAT6 Clear Snagless Boot

Combines the streamlined flexibility and protection of booted cables with the low cost and ease of installation of a non-booted cable.

Axiom's new clear snagless boot design on our CAT6 copper cables is the best of both worlds. It combines the easy disengagement and cost savings of a non-booted cable while providing the protection and strain relief of a booted cable. It's slim design is perfectly suited to fit in high density applications such as patch panels and multi-port server racks.

**Superior protection and cost savings
for high density environments**

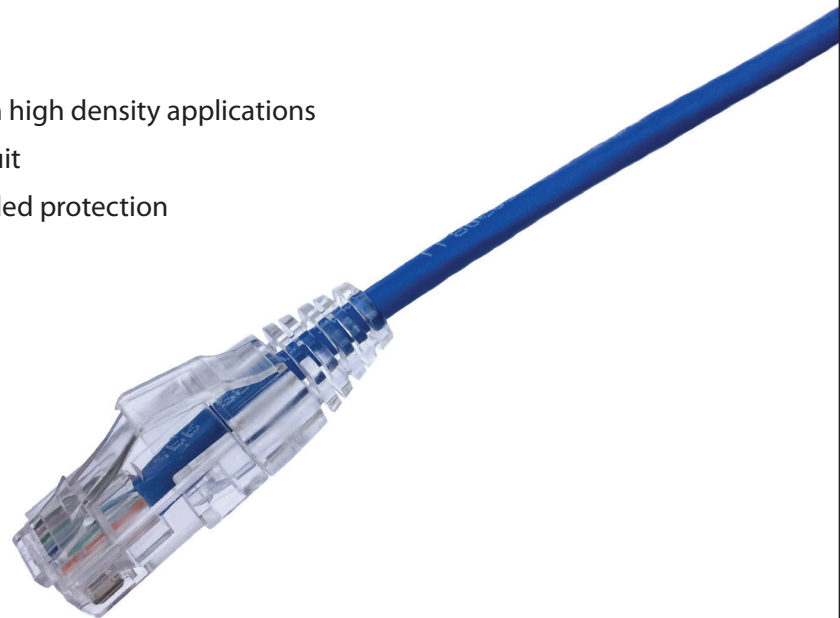

Key Benefits:

- Slimmer, streamlined boot design allows for installation in high density applications
- Snagless boot can easily be pulled through walls or conduit
- "Ferrari" type locking tab for easy disengagement and added protection
- Fully backwards compatible to CAT5 & CAT5e standards
- 4-pair (UTP) 24 AWG stranded copper
- UL Code 444 and TIA-568-C.2 Compliant
- 100% bare copper wire
